BIANCA **BESCIU**

JUNIOR FRONT-END DEVELOPER

ABOUT ME

As a front-end developer, my work is centred on responsive web design and development. My goal is to deliver friendly interfaces, with focus on both user experience and code quality.

I am a fast-learner and I like to deliver on time. I am committed to develop my knowledge further and stay relevant in the front-end development landscape. Additionally, I can use my communication background to clearly and effectively interact with clients and ensure a good professional relationship.

You can check my portfolio at https://bianca.amsterdam.

EDUCATION

2010-2012
Master's degree
N.S. of Political Studies

Managerial Communication and Human Resources

2007-2010
Bachelor's degree
University of Transylvania

Communication and Public Relations

COURSES

December 2017
Build Front-End Web Applications from Scratch
Codecademy

Built 2 web applications:
Jammming – using React components, state, and requests with the Spotify API to build a website that allows users to search the Spotify library, create a custom playlist, then save it to their Spotify account.
Ravenous – using JavaScript and React components.

November 2017
Web & Front-End Development
New York Code + Design Academy

Projects:
Icon Fetcher – API-based app, that uses iTunes API, by creating a lookup request to search for content in the stores based on iTunes IDs.
Cause Project – Multi-page app using HTML, CSS, Bootstrap, JavaScript.
