BIANCA **BESCIU**

JUNIOR FRONT-END DEVELOPER

ABOUT ME

As a Front-End Developer, my work is centred on responsive web design and development. I've trained to deliver friendly interfaces, with focus on both user experience and code quality.

My goal is to communicate clearly and effectively and to ensure a good relationship with clients. I am a fast-learner and I like to deliver ahead when working on a task. In addition to my skills, I am committed to stay up-to-date on industry trends and advancements.

COURSES

December 2017
Build Front-End Web Applications from Scratch
Codecademy

Built 2 web applications:
Jammming – using React components, state, and requests with the Spotify API to build a website that allows users to search the Spotify library, create a custom playlist, then save it to their Spotify account.
Ravenous – using JavaScript and React components.

November 2017
Web & Front-End Development
New York Code + Design Academy

Projects:
Icon Fetcher – API-based app, that uses iTunes API, by creating a lookup request to search for content in the stores based on iTunes IDs.
Cause Project – Multi-page app using HTML, CSS, Bootstrap, JavaScript.
